

Central Ozarks Medical Center and School of the Osage are partnering to bring staff and students access to medical care on campus! We are happy to introduce Mary Whitman as the provider for the School of the Osage Campus Clinic.

When your student gets sick while at school, Mary Whitman, FNP, will be located on campus and ready to help your students feel better. Quicker access means staff and students can begin to heal faster and get back to doing what they love. Keep watching for more information!
